

Aesculus parviflora

Bottlebrush Buckeye

Bottlebrush buckeye is a deciduous shrub or small tree with showy spikes of white flowers which occur at the tips of stems, in early summer. *A. parviflora* is a multi-stemmed shrub, with many upright branches and a spreading habit. This buckeye is excellent in masses, in a shrub border, or as a specimen plant. Bottlebrush buckeye has medium-coarse texture. Fall color is often bright yellow.

Height: 8' - 12', Spread: 8' - 15'
