

# *Aquilegia canadensis*

## Columbine

**Columbine has many desirable features. It will grow in dry to moist soil, is attractive to birds and butterflies, has delicate, colorful flowers, and interesting foliage, too! The showy red and yellow flowers occur during cooler months of spring. Plant in partial shade. *Aquilegia* has a long taproot, so don't divide; it germinates easily from seed in cool temperatures.**

**Height: 1' – 2'. Spread: 1' – 2'.**
