

Monarda punctata Spotted Horsemint

Spotted Horsemint is a biennial to short-lived perennial with flowers in whorls at the top of the stem. The corolla is yellow spotted with purple, the bracts are pink to purplish or greenish white. *Monarda punctata* grows in dry, sandy soil, in full sun to partial shade. The plant has an aroma that is reminiscent of thyme.

Height: 1' – 4'. Spread: 1' – 1 1/2'
